

## DYPSOE Testimonial

My name is Sanket Mundhe and I am going to Wayne State University at USA for pursuing Master of Science in mechanical engineering. After my junior college, I joined “Dr. D. Y. Patil School of engineering” to further my academic career. It was a very fantastic experience for me. Really, I feel fortunate to be a student of this college as I got plenty of opportunities to build an all round personality through the excellent academic atmosphere, various co-curricular, cultural and

sports activities.

I have been inspired by my head of department and the rest of the staff in the department and also my fellow students in class, department and college as a whole. Due to such encouragement, I was able to participate in various extracurricular activities and National events like Baja, Supra, and International Go-Karting Championship. Also as Student Chairperson of ‘SAE India Collegiate DYPSOE Club’ I got valuable guidance from the Director Dr. S. S. Sonavane sir and Dean Prof. A P Deshmukh sir. This has helped me to develop managerial skills and knowledge and personal competencies such as self-awareness, presentations, teamwork and leadership. In addition to that various workshops, Industrial visits tremendously helped me to enhance the skills in my domain.

Beautiful Campus, excellent infrastructure, well equipped laboratories, highly intellectual pedagogy with hands-on learning experiences had good impact on my life to shape my future. So, though I might climb cliffs of success, my true inspiration would always remain DYPSOE.
